# Nicholas Lee Wei Jie

Singapore, +65 9001 2830, nicholasleeweijie@gmail.com

**Profile**

Professional data scientist with a strong foundation in statistical analysis, machine learning, and data visualization. Proficient in Python, SQL, and a wide range of AI and data analytics tools. Experienced in designing and implementing data-driven solutions that drive business insights and optimize decision-making. Adept at working with large, complex datasets and communicating technical concepts clearly to both technical and non-technical stakeholders. Passionate about leveraging advanced analytics and AI to solve real-world problems and deliver measurable impact.

**Employment History**

Sep 2023 – June 2025 Barista, Starbucks

- Fostered a positive and collaborative team environment through clear communication and proactive support.
- Demonstrated strong time management by efficiently balancing customer-facing and operational duties during peak hours.
- Assisted in onboarding and training new team members by sharing knowledge of workflows, service protocols, and best practices.

Mar 2024 – Mar 2025 Data Engineer & Data Scientist Intern, OCBC Group Data Office

- Conducted UAT testing and supported sandbox environment maintenance, ensuring data solutions met performance and stability benchmarks.
- Developed and maintained ETL pipelines using Apache Kafka, Flink, and DBT, enabling real-time and batch data processing.
- Worked with Teradata and SQL to manage, query, and validate structured data from enterprise sources.
- Collaborated across cross-functional teams to gather requirements and translate business needs into data solutions.
- Independently presented technical updates and project outcomes to business stakeholders, demonstrating clear communication and business acumen.

Dec 2021 – Mar 2022 Retail Sales Assistant, Cold Storage Singapore

- Assisted in inventory management, ensuring accurate stock levels for optimal sales performance.
- Contributed to a positive work atmosphere by consistently demonstrating a professional attitude towards colleagues and customers alike.
- Boosted add-on sales through suggestive selling techniques and product recommendations.
- Addressed customer issues tactfully, resolving any concerns while maintaining a high level of professionalism.

## Education

Apr 2022 – Apr 2025 Diploma in Applied Artificial Intelligence, Temasek Polytechnic

- 3.52 GPA
- Vice-Captain/Quartermaster of TP Sports Climbing
- Data Science & Engineering Intern, OCBC Group Data Office

Jan 2018 – Nov 2021 Singapore-Cambridge GCE Ordinary Level Certificate, Tanjong Katong Secondary School

- Class Chairman, Class of 2022

Jan 2012 – Nov 2017 Primary School Leaving Examination Certificate, Poi Ching Primary School

## Projects

In Progress (2025) InternHunt – Internship Aggregator Platform

- Co-developing a web-based platform that consolidates internship listings from sources like LinkedIn, Indeed, and Glassdoor.
- Building AI features to parse resumes and intelligently recommend suitable roles based on candidates' backgrounds.
- Aims to streamline internship discovery and matching for students across Singapore.

OCBC Bank, 2024 RM Copilot – AI-Powered Client Intelligence Tool

- Developed a centralized platform to assist Relationship Managers in retrieving client information across multiple systems.
- Leveraged Large Language Models (LLMs) to personalize client profiles and generate actionable insights.
- Improved efficiency in client servicing and decision-making by reducing time spent on data retrieval and synthesis.
